

Peregrine Tank/Sump Heater: P309

The **PEREGRINE P309** screw-in internal tank/sump heater warms the oil to ensure smooth engine start-up and running in low ambient temperatures.

At low ambient temperatures oil has a high viscosity and this can cause drag problems with engine starting and may also cause wear on cold start-up due to poor initial oil circulation. To prevent these problems the lubricant may be warmed by an engine oil heater, which will reduce oil viscosity. PEREGRINE oil sump heaters are often fitted as a supplement to coolant pre-heaters in very low ambient temperatures and are used extensively on air-cooled engines.

Product Code	P309/3S.7	P309/4S.7	P309/5S.7
Wattage	250	350	500
Voltage	230V		
Type/Orientation	Coiled, straight (ie, 90° to sump wall)		
Thread/Flange Size	1 1/4" BSP parallel with washer supplied		
Max Immersed Length	162mm	162mm	162mm
Weatherproof	No		
Withdrawable	No		
Thermostat Temp	Non-Thermostatic		
No of Elements	One		
Element Finish	Nickel Plated with Chrome Finish		
Cable Length Fitted	2000mm		
Cable Armour Fitted	No		

Shipping/Warranty Information	
Shipped Dimensions (mm)	400 (L) x 260 (W) x 160 (D)
Shipped Weight	2.5kg
Warranty	Standard 12 months from delivery

Designed and Built in the UK
