

# Specification Sheet

## Peregrine Single Phase Water Heaters

PEREGRINE Immersion Water Heaters have been designed for industrial use using high quality metals and fittings with a fixed-setting thermostatic control.

Our screw-plug (threaded) immersion heaters transfer heat directly to the water and are ideal for maintaining the water temperature to prevent freezing in critical environments such as large storage tanks, foam tanks, water pipelines and water jacket housings. All models are supplied with a thermostat set at 10°C unless otherwise requested.

Technical Specification	
Wattages	From 250W - 3000W depending on thread (BSP) size
Voltage	230V AC*
Weatherproof	Weatherproof and standard models available
Thread (BSP) Sizes	2", 2¼" or 3" Male Parallel Brass
Max Immersed Length	Max 700mm
Withdrawable or Fixed	Fixed
Thermostast Temp	Set at 10°C Fixed
No of Elements	3
Finish	Nickel or Copper dependant on application
Supplied with	2m cable, gasket or sealing washer. Weatherproof models supplied with 1750mm flexible conduit

\* Three-phase models also available

### MILD STEEL TANK BOSSES

Description	Product Code
2" BSP for 493/494 Heaters	P123
2¼" BSP for 554/555 Heaters	U36
