

# Anti-Vibration Kit for Clarke Engines: Model PVAC

**Preheat Engineering** Anti-Vibration Kits have been designed for use when the heater has to be mounted directly to the engine or in high vibration situations to prevent heater damage through excessive vibration.

We would always recommend that one is fitted in these applications. Model PVAC is for use on Clark engines. Using a mounting plate and U-clamps, these kits are quick and easy to install and will provide the required heater protection

<b>Model</b>	<b>PVAC</b>
<b>Main Bracket</b>	Plated Steel
